

# MAGO

Mago4 represents the new **family of management solutions** able to meet the most varied operational, development, and business needs in the field of company management.

The system is developed starting from a reliable architecture and solid experience in the field of ERP software, whose individual segments are enhanced thanks to **renewed development models and original components**.

Mago4 integrates with the ecosystem of Zucchetti solutions, standing out in terms of **flexibility, scalability** and **utmost customization** possibilities, thanks to high-performance tools.

Mago4 is a management application with a strong **international vocation** right from the design stage. That's why Mago4 ERP proves to be naturally inclined to support the development of any **foreign localization**.

## PLATFORM AND DEVELOPMENT

The support infrastructure is represented by **TaskBuilder Framework**, a framework which constitutes an independent environment. **TBF** represents an application base that can be managed independently and is available on client/server and/or web platforms, on which vertical solutions, add-ons and embedded and stand-alone cross products can be developed.

**TaskBuilder Studio** stems from the optimization of a consolidated development platform. **TBS** is an advanced and independent **programming environment** which provides a set of development tools that can be used by the simple power-user, consultant or professional developer. TaskBuilder Studio is available in client/server as well as web platform versions.

Mago4 is the ERP with a design, look and feel and user experience designed to follow the **web usability criteria** of latest generation devices. From the graphic and organizational standpoint, Mago4 is structured to ensure **utmost ease of use** and to manage business processes according to established, solid and profoundly secure procedures. Mago4 is available in client/server mode with **Mago4 desktop** and in the web version **Mago4 web**, with a dynamic and functional design.

2 MODES

Access Mago4 ERP wherever you are, on any device

Maximum performance on your PC
